

ProPak Asia: Impactful Meaning for Sustainable Future

Running an exhibition "ProPak Asia" gives us lots of opportunities to improve our impacts environmentally, socially and economically in our region. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

We do this not only because our partners & attendees tell us that they care that our events are run in a responsible manner, but because it is the right thing to do for our customers, colleagues, and the communities we serve.

Do you know?

ProPak Asia is considered a sustainable event, according to Thailand Sustainable Event Management Standard (TSEMS).

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased renewable electricity for over 90% of our event.

Sustainability Partners: Connect the Communities

Company Name: ACMI SpA

Booth No.: AE33

Product Name: The "GoGreen" project represents ACMI's vision of a plastic-free food & beverage industry. Thanks to the introduction of the Rocket E-500 pallet wrapper, which joins a whole series of "plastic-free" machines, from high-speed tray formers, to robotic cartoners, to horizontal end load cartoners, ACMI has completed the "green" range and is now able to offer its customers a highly sustainable secondary packaging system without plastic and with reduced environmental impact. Recyclability, sustainability, social responsibility, less environmental impact and less pollution: this is what ACMI has set as its goal for the future of the packaging industry.
