

### ProPak Asia: Impactful Meaning for Sustainable Future

Running an exhibition "ProPak Asia" gives us lots of opportunities to improve our impacts environmentally, socially and economically in our region. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

We do this not only because our partners & attendees tell us that they care that our events are run in a responsible manner, but because it is the right thing to do for our customers, colleagues, and the communities we serve.

Do you know?

ProPak Asia is considered a sustainable event, according to Thailand Sustainable Event Management Standard (TSEMS).

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased renewable electricity for over 90% of our event.

## Sustainability Partners: Connect the Communities

**Company Name:** ELPLAST ASIA CO., LTD.

**Booth No.:** E52

**Product Name:** Elplast focuses its efforts to limit any potential negative impact on the natural environment as a consequence of our activities. This approach is expressed through our focus on four key areas: power consumption, water consumption, waste disposal and emission of greenhouse gases.

We all know that flexible packaging has the lowest carbon footprint compared to its' rigid packaging counterparts. However consumers are often confused about the benefits. Eplast has several solutions to complete the picture. We now have EL-ZIP grades available in compostable and biodegradable.
