

ProPak Asia: Impactful Meaning for Sustainable Future

Running an exhibition "ProPak Asia" gives us lots of opportunities to improve our impacts environmentally, socially and economically in our region. We want to make our event more responsible and play a role in helping our markets improve its own sustainability through connecting people with the networks and knowledge they want to help solve the big challenges in our sector.

We do this not only because our partners & attendees tell us that they care that our events are run in a responsible manner, but because it is the right thing to do for our customers, colleagues, and the communities we serve.

Do you know?

ProPak Asia is considered a sustainable event, according to Thailand Sustainable Event Management Standard (TSEMS).

As part of our commitment to reducing our event carbon impact, and our journey to Net Zero we are excited to announce that we have purchased renewable electricity for over 90% of our event.

Sustainability Partners: Connect the Communities

Company Name: HANGZHOU ZHONGYA MACHINERY CO., LTD.

Booth No.: N70

Product Name: We offer the sustainable solution for the dairy and beverage industry with our dry method sterilization technology of vaporising hydrogen peroxide for PET bottle which are widely used in the FMCG applications. It eliminates the need for large volume chemicals and cuts down the energy consumption compared to the traditional wet method technology, so that the environmental impact is reduced and the health risks are minimized. Additionally, hydrogen peroxide is eco-friendly. By adopting this approach, we could also minimize our carbon footprint, enhance operation efficiency and safety, and contribute to sustainable future for the liquid food packaging sector.
