DigitalizationAsia at ProPak Asia 2026

Where Digital Innovation Meets Processing & Packaging Excellence

As the industry evolves toward smart factories and sustainable supply chains, digitalization is driving unprecedented transformation. The Digitalization Zone at ProPak Asia 2026 brings together technology leaders, automation providers, and digital innovators to showcase the future of processing and packaging operations.

This zone is dedicated to solutions that enhance productivity, improve traceability, reduce environmental impact, and empower decision-making across the value chain.

At ProPak Asia 2026, explore how AI, IOT, robotics, machine vision, cloud platforms, and digital twins are reshaping everything from factory floors to consumer experiences.

What You will Discover:

Featured Technologies

- **Smart Manufacturing Solutions;** Real-time data, automation, and robotics for increased efficiency
- **Digital Supply chain Integration;** Traceability, transparency, and connected logistics
- **AI & Analytics in Packaging;** Smarter design, predictive maintenance, demand forecasting
- **Sustainable Digital Tools;** How digitalization supports ESG goals and carbon reduction
- **Human + Machine Collaboration;** Empowering workforce transformation through technology

Why Exhibit?

- As an exhibitor, you'll be at the center of the region's most influential platform for:
- **Showcasing** cutting-edge technologies to qualified decision-makers
 - **Connecting** with decision-makers across F&B, pharma, cosmetics, and more
 - **Demonstrating** real-world use cases to high-potential buyers
 - **Positioning** your brand as a leader in smart, sustainable innovation

Key Exhibit Categories:

Industry 4.0 & Smart Factory Solutions

- IoT platforms, edge computing, cloud-based control systems
- Real-time monitoring, predictive maintenance, and remote diagnostics
- Enterprise Resource Planning (ERP), Product Life Cycle Management (PCM)
- Product Life Cycle Management (PCM)
- Cyber Security, Data Infrastructure

2 Automation & Robotics

- Robotic arms, cobots, material handling automation, sorting systems
- Automated lines and end-of-line solutions

3 AI & Machine Learning Applications

- Quality control, demand forecasting, adaptive systems

4 Vision Systems & Smart Sensors

- Machine vision for inspection, smart barcode and RFID solutions
- Environmental and condition monitoring

5 Digital Supply Chain & Traceability Technologies

- Blockchain, digital twins, supply chain visibility and optimization tools

6 Electrical & control

- Connectors, Control System, Inverter / Converter, Wiring, Circuitry & Conduit
- Sensors & Safety Components
- Vision & Inspection Systems

7 Drive & Motion

- Fluid Power, Actuators, Air Dryers, Compressors
- Filter & Filtration, Hose & Tube, Seals & Sealing Technology, Vacuum Technology
- Hydraulic Fluids / System, Lubricators
- Pneumatic system, Pumps & Valves
- Power Transmission, Power Transmission Accessories
- Bearing, Clutches and Brakes, Gears & Wheel,
- Linear Motion, Motors & Drives Technologies
- Convertors and Components

8 Sustainability-Driven Digital Solutions

- Carbon tracking, waste reduction systems, and circular packaging platforms
- Energy Management Solutions, Power-Saving Production Technologies
- Building Decarbonization, Industrial Sustainability
- Renewable Resources

Who will Visit:

- Processing and packaging manufacturers (food, beverage, pharma, cosmetics, etc.)
- Plant managers, production engineers, and R&D teams
- Procurement and supply chain executives
- Sustainability officers and ESG professionals
- Tech-forward SMEs and startups looking to scale
